Subject: Branch Review Draft of Final IMI Bee Risk Assessment
Attachments: Imi Final Bee Assessment 3-4-19v3_Cleaned.docx

Hey Justin,

Attached is the above for your review. Here are the sections that you should spend the most time on.

1. Executive summary (especially the text up to and including the risk table)
2. Non-Ag Use/Exposure sections
3. Tier III Field studies in Effects Section
4. Section 6 (Risk Characterization, esp. 6.2—higher tier assessment)

In fact, I would probably start with Section 6.2, then move to Exec Sum to see how well it comports.

Also, if you want to review this prior to sending to PRD, that is fine. I know we talked about concurrent, but there are still some hanging chads that would be good to nail down before sending to them. Your call though.

Meghann et al; I'll post this to the Sharepoint along with a version that shows most of the latest changes I made (there has been a lot).

Cheers,

Keith
